RW-COMP SUIT

ABOUT

One of our most popular model, the RW-Comp has been developed for experienced formation jumpers. The goal was to get the perfect suit for skydiving, tunnel training and of course competitions. Body front and upper arms are made of strong nylon, the back is full spandex, so the tight-cut lower arms. The suit is fast (tight cut), the large booties are made of cordura 1000, designed for fast turns and stabile flying. The knees are also reinforced by cordura, extra protector available.

MATERIALS

- nylon, or taslan
- Cordura 1000 reinforcements
- spandex elastic parts

FEATURES

- tight fit
- bootie
- strengthened cordura knee and bottom
- double grips on legs
- shoulder padding

EXTRA OPTIONS

- extra pocket
- double grips on arms
- windproof zipper
- knee protect, elbow protector
- heel on bootie
- viso pocket
- inflatable bootie

**FREEFLY EXP**

**ABOUT**

By designing the suit we tried to have the minimum elastic elements to make the suit most homogen, and because the elastic material gets wear out the fastest of all the materials we have by the extremely active tunnel hard usage. We recommend to have this suit mostly for tunnel instructors, and dynamic flyers. Intudair is proud to achieve the comfortable sense while flying in the EXP, which -meantime- also allows free movements with a help of innovative 3D design and curved tailoring lines.

**MATERIALS**

- Taslan 4-ply main parts
- Cordura 1000 reinforcements
- Brunico WX elastic parts

**FEATURES**

- tight fit
- windproof elastic
- strengthened cordura knee
- windproof zipper

**EXTRA OPTIONS**

- tight limbs
- inner pocket
- cordura bottom
- knee protector
- freefly grips for FS4, for professional tunnel flyers, freeflyers

**FREEFLY FEMME**

# Freefly Femme

**i ABOUT**

Please meet our first design specifically dedicated to skydiver women!  
The main conception was to create a dress which is more than a sportswear since Intrudair wants to impress the eternal beauty of women and highlight their silhouette with curved insets around the body. The elastic parts are produced by Brunico WX, a very strong elastic material so You can experience the advantage of body shaping, which also helps You doing elastic movements without any limits.

**🏐 MATERIALS**

- taslan 4 ply or nylon
- Cordura 1000 reinforcements
- Brunico WX elastic parts

**⚙️ FEATURES**

- girly cut
- assymmetric design
- technical leg cuff
- windproof zipper
- lot of elastic parts

**⚡ EXTRA OPTIONS**

## SWOOP PANTS

### ABOUT

Our summer swoop pants are tightly tailored with lots elastic elements included around the thigh, knees and inner leg areas. The product's main fabric is 4-Ply Taslan, and Brunico WX elastic material.

You can order it as long pants with cordura shin which is extremely abrasion resistant and slightly stretch backwards to make the pants stronger around the calf area.

### MATERIALS

- Taslan 4-ply main parts
- Cordura 1000 reinforcements
- Brunico WX elastic parts

### FEATURES

- tight fit
- windproof elastic
- strengthened cordura knee and bottom
- jeans pockets

### EXTRA OPTIONS

- extra pocket
- RDS pocket
- nylon front
- knee protector
- tailbone protector
- long version

**FREEFLY PANTS**

**ABOUT**

The long versioned freefly pants are produced with comfortably simple tailoring lines, so that is why they have such a fit and straight cut. Also you can ask for a more loose version of it, in case you would prefer tight version, please go for our swoop pants since they have much more elastic elements.

Our freefly pants are good for low altitude jumps, packing and any other dropzone activities.

**MATERIALS**

- Taslan 4-ply main parts
- Cordura 1000 reinforcements
- Brunico WX elastic parts

**FEATURES**

- durable
- jeans pocket
- strengthened cordura knee & bottom
- built in belt

**EXTRA OPTIONS**

FFC+ SUIT

ABOUT

We recommend this suit for Camera folks, AFF instructors and last but not least for Fun Jumpers, because it's slim on the body, and both arms and legs are loosely tailored. It is a very comfortable model thanks to the windproof Brunico WX elastic parts.

This is an ultimate dropzone suit, since it can be useful in such a wide speed range thanks to the proper material selection, and the ideal cut of the arms and legs.

MATERIALS

- taslan or nylon
- Cordura 1000 reinforcements
- Brunico WX elastic parts

FEATURES

- fit body cut
- Meidum/Slow fall rate
- strengthened cordura knee and bottom
- windproof elastic parts
- technical leg cuff

EXTRA OPTIONS

- extra pocket
- freefly grips on arms & legs
- windproof zipper
- knee protector
- cordura arms
- cordura shin
- air ventillation on legs

STUDENT SUIT

S, M sizes

Nylon front  
tight elastic lower arm

L, XL sizes

Belga Polycotton front

STUDENT  
Suit

ABOUT

Intrudair Student Suit made of strong 4 ply taslan or Belga Polycotton material. It goes with Cordura reinforcements on knees and bottom, and massive grips on arms and outside of the legs. Inside pocket and high neck are basic. Type of the materials are according to the size of the suit. Also the cut of the suit is different: for small suits it's tight, and bigger suits it's more loose on chest and upper arm for the correct falling rate. For every claim, We make a proper artwork what is FREE.

MATERIALS

- taslan or Belga Polycotton
- Cordura 1000 reinforcements
- lycra elastic parts

FEATURES

- massive grips on the arms and legs
- Cordura knee and bottom
- Ykk zipper and nylon sewing
- elastic parts
- inside pocket

EXTRA OPTIONS

- full cordura legs and arms (for heavy weight students)
- extra DZ embroideries
- massive grips in 2 sizes: diameter 2,5 cm or 3,5 cm

Neck type: high

Wrist type: elastic

Speed of the suit: normal fast

MULTI SPEED

Instructor Suit

ABOUT

Our previous Instructor model has been renewed, it is unique on the market nowadays. The suit can be narrowed and loosened by a zipper /multispeed/ going through on the limbs. We recommend this suit for AFF instructors, coaches, tandem pilots, who don't have time to change suits between the jumps. The suit comes with strong sewing, cordura reinforcements at knees and bottom, windproof elastic parts. You can order your suit with different speed.

MATERIALS

- Taslan
- Brunico WX elastic parts
- Cordura reinforcements

FEATURES

- multispeed arms and legs
- windproof elastic parts
- extra size pocket for radio
- elastic wrist
- velcro leg cuff

EXTRA OPTIONS

- cordura knee, bottom, shin, arms
- small print
- extra pocket
- air ventilation system
- rush order
- windproof zipper

WINTER SUIT

**i ABOUT**

The freelly winter suit is produced from 100% highest quality of softshell wind and waterproof materials with elastically comfortable soft lining layer inside. The most significant advantage of this kind of material is that it has a breathable membrane layer that lets water vapor out and prevents water from entering, also it's totally windproof. Finally, with a long and warm neck you won't get cold!

**⚽ MATERIALS**

- SoftShell
- Elastic lining
- Cordura reinforcements

**⚙️ FEATURES**

- wind and waterproof
- comfortable elastic fit
- printable material
- windproof zipper
- looped cuffs

**⛶ EXTRA OPTIONS**

- extra pocket
- knee protector
- freelly grips
- cordura bottom
- print
- rush order

TRACKING SUITS

Tracking  
suit

ULTIMATE  
TRACKING

**i ABOUT**

Intrudair offers 2 different type of tracking suits. One is great from beginner level to advanced, just to enjoy the skydiving in tracking position. Pure fun.  
The other suit provides more performance as it has bigger surface, but it needs an experienced pilot to use. We recommend this suit for BASE jumpers with relevant background in tracking, but it's a good challenge from plane in tracking competitions as well.

**⚙ MATERIALS**

- Nylon
- Brunico WX elastic parts

**⚙ FEATURES**

- 3D air inlets
- looped cuffs
- printable material
- free hand movement

**+ EXTRA OPTIONS**

- optional bootie (only for plain tracking suit)
- cordura knee & bottom (only for ULTIMATE)
- rush order
- pick & tail pocket

WAHOO TRACKING

One-piece

ABOUT

Welcome to Intrudair's newest tracking suit, which comes in one piece, and with extreme performance. The suit has a rapid start, and the glide ratio can easily go above 2, and it is easy to fly! You can choose if you want it with our without booties. In the development phase the main focus was on the safety, easy maneuverability and high speed. We did our best to max out the performance! Through the optimized air inlets, the inflation is super fast, providing fast and safe exits.

MATERIALS

- Nylon
- Brunico WX elastic parts

FEATURES

- 3D air inlets
- looped cuffs
- printable material
- free hand movement
- many pockets

EXTRA OPTIONS

- optional bootie
- backfly inlets
- rush order
- pick & tail pocket

PIRANHA 3

WINGSUIT

**i ABOUT**

The Piranha is a great choice for beginner and advanced flyers alike. A stabile planform with a wide range of uses is what makes the Piranha so popular. Fly the Piranha on its back, flock, fly dynamically, acrobatically, perform or just surf the clouds. For a beginner, the Piranha3 is very easy to fly. Deployment is clean without any stress and the arm wings do not cover the pilot-chute at all. It's a great suit to learn all the foundations of the discipline that is wingsuiting.

**⚽ MATERIALS**

- Nylon
- Brunico WX elastic parts

**⚙️ FEATURES**

- 3D air inlets
- backfly inlets
- escape sleeves
- BASE sole
- zip-up cord

**⚡ EXTRA OPTIONS**

- printable design
- arm cutaway system
- leg cutaway system
- extra pocket
- tail pocket

BARRACUDA 2

WINGSUIT

ABOUT

The Barracuda 2 is a great all purpose suit. This intermediate surfaced suit gives You freedom of flight. Recommended about 40 wingsuit jumps before try, but You will be surprised when you feel just more time and glide with no difficulty in usage. Thanks for the grips You are able to tense the wings, and get some extra lift. Big Air inlets makes the start fast, and the „easy to pull” cutted wingshape gives 100% percent competency for BASE jumps. Perfect choice for camerawork and challanging in flocks.

MATERIALS

- Nylon
- Brunico WX elastic parts

FEATURES

- 3D air inlets
- backfly inlets
- escape sleeves
- BASE sole
- zip-up cord

EXTRA OPTIONS

- printable design
- arm cutaway system
- leg cutaway system
- extra pocket
- tail pocket
- rush order

BARRACUDA FREESTYLE

WINGSUIT

ABOUT

Very easy to fly, and even if You think on a barrel roll, it happens. Totally handy while backflying, and You can transform it easily to headdown. As no grips, You are able to grab your friend and having fun together. It gives You freedom in flights and clean deploy every time. And if You want to learn and do acro wingsuiting, then competing, then this is the right choice. You can be part of any kind of flock with this suit. Barracuda Freestyle is able to fly fast and slow as well, agile and handy in one time.

MATERIALS

- Nylon
- Brunico WX elastic parts

FEATURES

- 3D air inlets
- backfly inlets
- escape sleeves
- BASE sole
- zip-up cord

EXTRA OPTIONS

- printable design
- arm cutaway system
- leg cutaway system
- extra pocket
- tail pocket
- rush order

BARRACUDA POWER

WINGSUIT

**i ABOUT**

Made for experienced pilots who can handle speed and able to open safely with grips. You can reach incredible number in Km/h and glide ratio as well. Suit has ability to fly fast, and slow too. And naturally it goes very well on the back. Barracuda Power has a high performance characteristics like deep armwing angle, extended wing surface and 20 cm grips to extend your arms like an arrow. 3D air inlets, halved cells, reinforcements, escape slaves.

**MATERIALS**

- Nylon
- Brunico WX elastic parts

**FEATURES**

- 3D air inlets
- backfly inlets
- escape sleeves
- BASE sole
- zip-up cord

**EXTRA OPTIONS**

- printable design

## PRINTING

### ABOUT DIGITAL PRINTING

This technique is an open door for custom designs. It has the ability to print on the fabric without almost any color limitation, basically in photo quality. It doesn't have an extra layer feel, the fibres organically become one with the tint. Although embroidery has its own perks, digital printing can overcome with no color and gradient limitations.

Apart from our wide fabric color palette, you can select from our always growing premade patterns, or provide us graphics to print it on your suit. If you don't have a graphic, but you want to have a custom one, we can also do it with some extra fee, see details on webpage.

### HOW DOES IT WORK?

The first option to select from our patterns in the coloring software. This case you have nothing extra to do, the original process applies. In case you have an own graphics, you can send it to us, and wait for confirmation. Before sending, please make sure that the quality is print-ready, at least 200 dpi, because we want to avoid pixelated or blurry graphics. If you want us to design custom graphics, contact us with your ideas and we will get back to you with a quotation and design plan.

PRICE DEPENDS ON THE PROPORTION OF PRINTED AREA OF THE SUIT
